Department of Health
Promotion, Prevention
and Early Detection of
Diseases

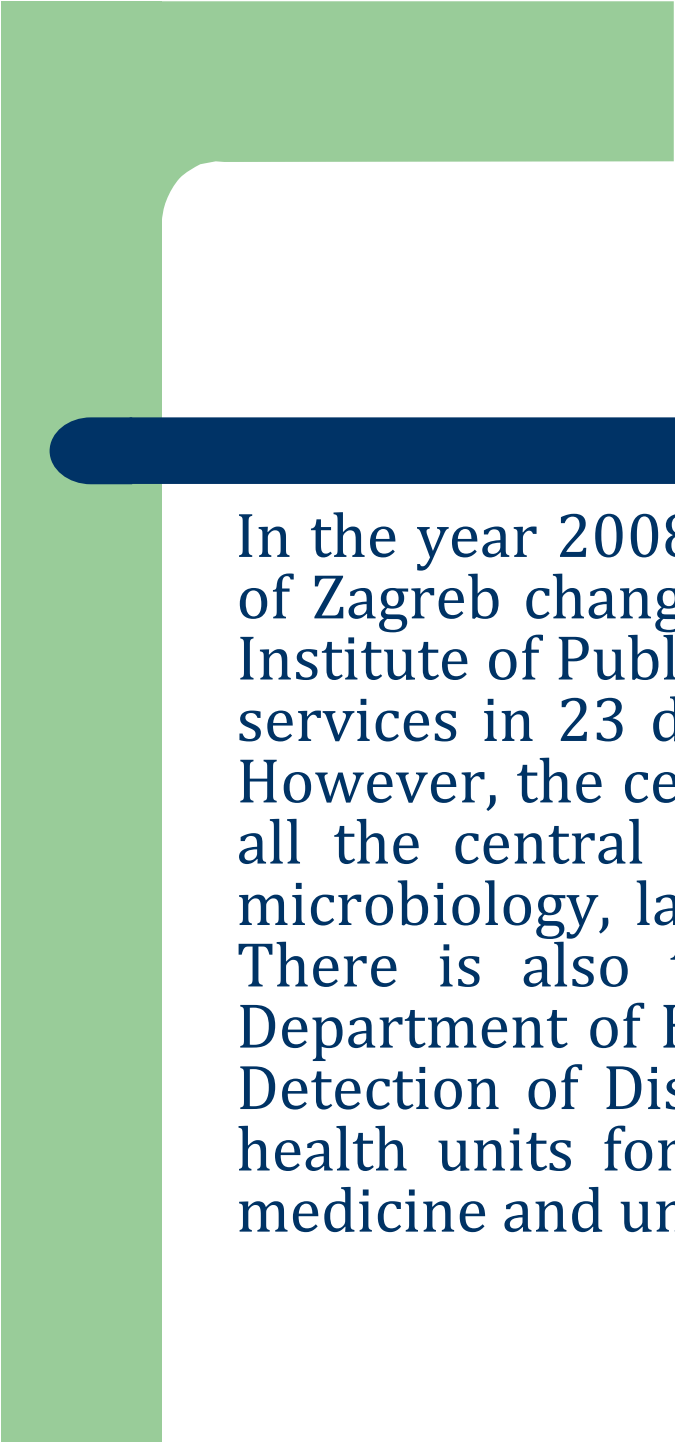

ZAVOD ZA JAVNO ZDRAVSTVO
DR. ANDRIJA ŠTAMPAR
INSTITUTE OF PUBLIC HEALTH

Introduction

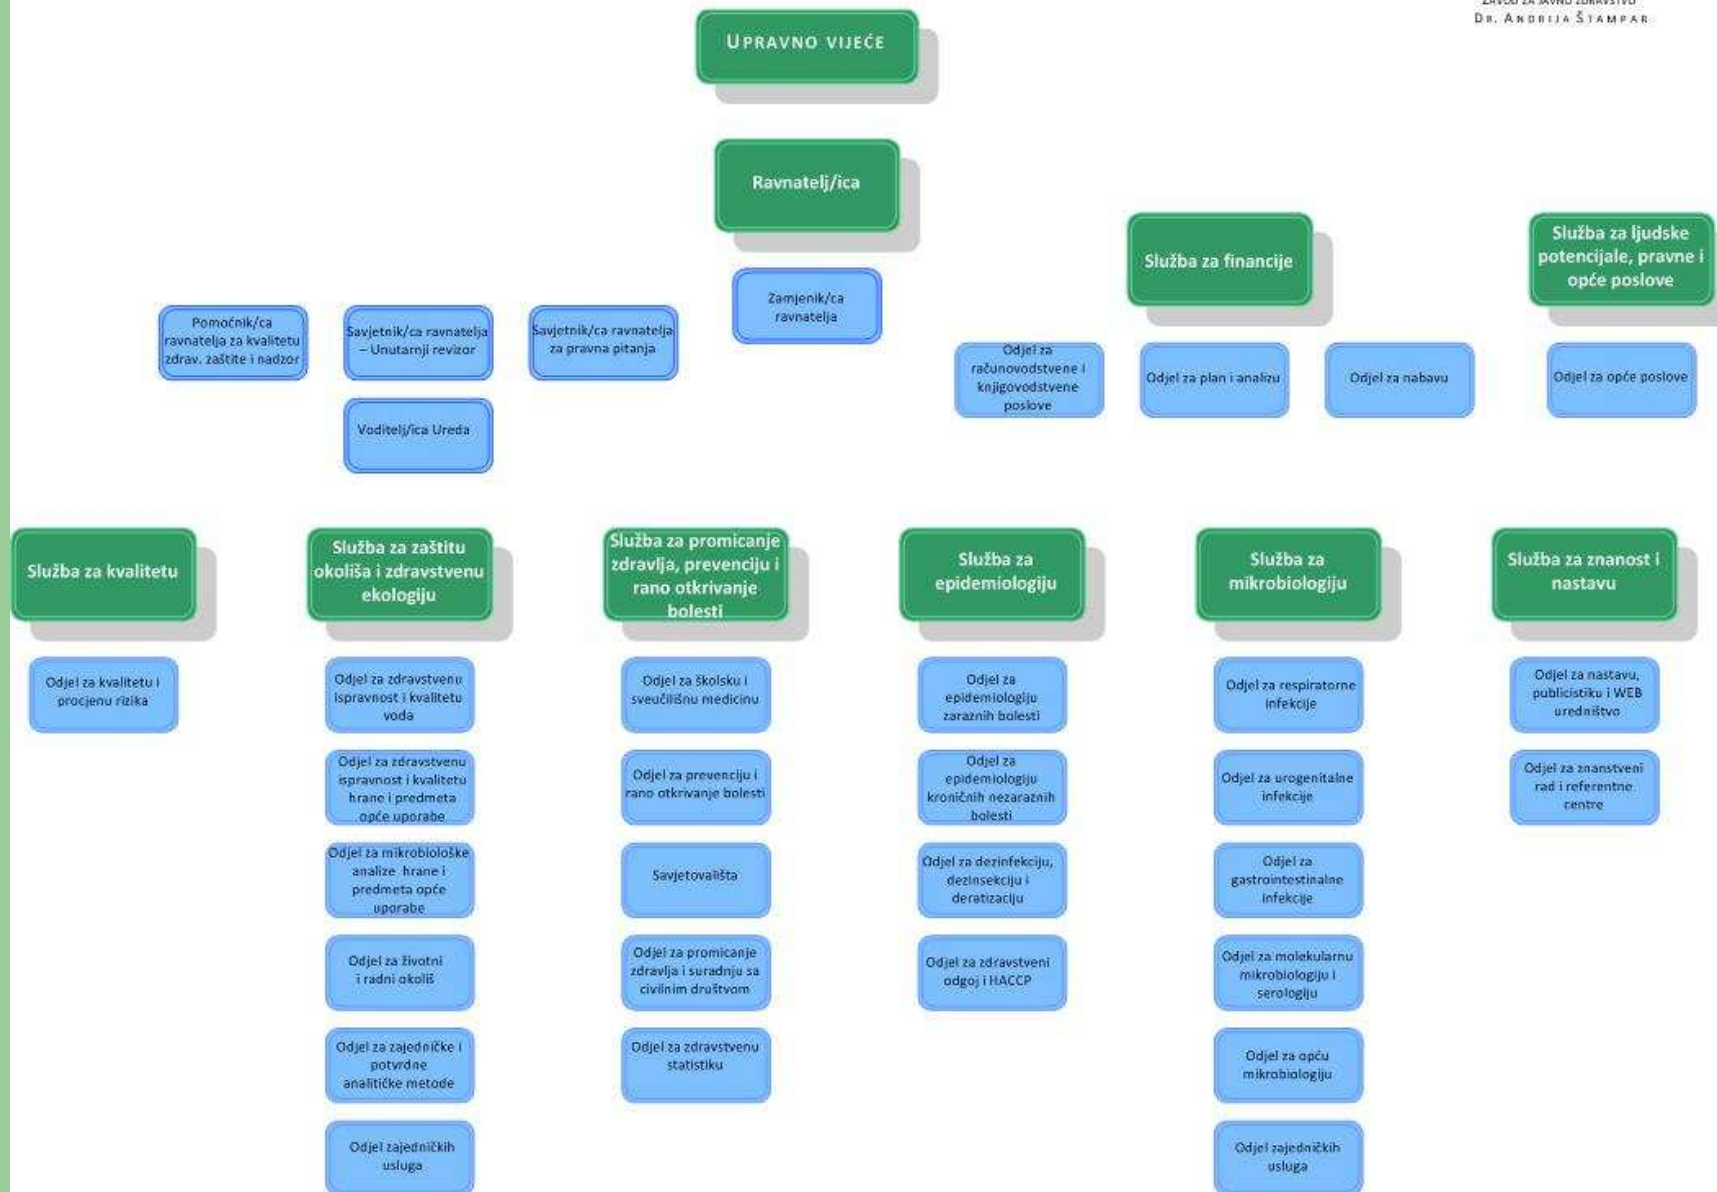

Dr. Andrija Štampar Institute of Public Health was founded in 1949 as the Department of Hygiene. Since then, the Institute has been the central institution in the City of Zagreb in the field of hygiene and preventive medicine.

In the year 2008 the Public Health Institute for the City of Zagreb changed its name into “Dr. Andrija Štampar” Institute of Public Health. The Institute organizes health services in 23 different locations in the City of Zagreb. However, the central one is in Mirogojska Street, where all the central laboratories are located. For example, microbiology, laboratory diagnosis and health ecology. There is also the Department of Epidemiology, the Department of Health Promotion, Prevention and Early Detection of Diseases. On different locations there are health units for school medicine, units for preventive medicine and units for out-patient treatment.

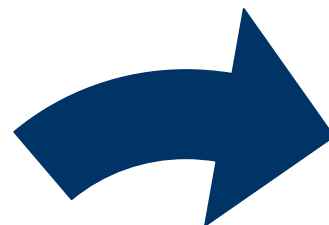

Mental Health and Addiction Prevention

Unit for preventive medicine
Mental Health Counseling

Units for outpatient care

Units for
outpatient care
Remetinečki Gaj

Mental Health and Addiction Prevention

1. Mental health promotion

- informing the public about the importance of mental health
- reducing risk factors in mental health
- promoting healthy lifestyle

2. Health services within primary prevention in the field of mental disorders

Units for out-patient care

1. **Substitute programmes:**

- methadone therapy (short term detoxification-up to a month)
- long term – up to six months
- lifelong therapy

2. **Drug free programme**

Units for out-patient care

- cooperates with social welfare centers and the state attorney for under-aged with behavioral disorders
- cooperates with family medicine and school medicine specialists and schools
- cooperates with NGO. The cooperation is based on the patient preparation in a therapeutic community

Units for out-patient care
